## EDUCATION

**Arizona State University | School of Electrical, Computer and Energy Engineering**

Graduating May 2026

- Awards: New American University Scholarship, Dean's List
- GPA: 3.58

## SKILLS

**Technical Skills:** MATLAB, Excel, Fusion 360, LTSpice, Digital Design, KiCad, Arduino, Python

## PROFESSIONAL EXPERIENCE

**Center for Accelerating Operational Efficiency - Intern**

June 2024

- Used data analysis and simulation to solve critical real-world challenges encountered by the Department of Homeland Security relating to TSA
- Acquired expertise with various tools for data analytics, decision analysis, excel, simulation, and operations research techniques.
- Used various software programs to simulate situations and collect data in order to make conclusions on what methods are most proficient.

**SHaDE Lab ASU - Engineering Team**

January 2024 - May 2024

- Aided in building a Power supply for a Thermal and Weather sensing robot for the MarTiny Project.
- Utilized Arduino programming and a microcontroller to enable hardware, such as cameras and sensors connected to the arduino, to detect and differentiate between people in shaded and sunlit areas.

**ASU FURI - Researcher**

August 2024 - Present

- Developing beamforming methods and algorithms using microcontrollers such as arduino to achieve sensing applications, such as localization of people in a room, and vital signs using metasurfaces.
- Using deep learning AI algorithms to improve the sensing applications of the metasurfaces.

**Engineering Student Success Office - Office Assistant**

February 2024 - Present

- Supporting various Student Success and engagement initiatives within the Ira A. Fulton Schools of Engineering.
- Organizing and engaging with the public within major Fulton signature events such as FURI, EPICS, and GCSP.

**Institute of Electrical and Electronics Engineers - Member**

November 2023 - Present

November 2023 – Present

- Actively engaging in the engineering community to pursue and learn about more opportunities in the field.
- Participating in company tours and meeting with industry professionals.

## LEADERSHIP EXPERIENCE

**ASU Fulton Ambassador**

November 2023 - Present

- Promoting the Ira A Fulton School of engineering at ASU through tours and events.
- Sharing the ASU experience from a student's perspective.
- Leading tours and facilitating events to engage students in the ASU school experience.

## PROJECTS

- Creating a digital readout of Voltage, current, and power of a solar panel using an LCD display.
- Designing circuits using wye generators, rectifiers, and diodes in academic Labs.
- Designing a complete microprocessor with digital circuits.
- Designing rings and jewelry using Fusion 360 to distribute to organizations at ASU.
